

Release Notes for FW110:

	Description
1.	Added GoPro controls. User can control GoPro functions using button configuration or through voice commands. Please download the latest user manual for details.
2.	Reduce mic opening too frequently during intercom. The sensitivity of the mic can also be adjusted through CLEARLINK, under the Configuration->Open Mics Sensitivity option.
3.	Added support for OBI (Open Bluetooth Intercom). OBI is seamlessly integrated into the UCLEAR's universal intercom, it can connect to OBI devices using the universal intercom pairing.
4.	Added voice command support for Spanish, French, German, Italian. User must update the new voice commands through CLEARLINK, under the Configuration->Voice Command option.
